

Unique Heel Access  
and Visualization

Reduced Workload

Confident Offloading  
by "Floating the Foot"

**HeelP.O.D.™**  
PRESSURE OFFLOADING DEVICE

The **ONLY** Pressure Offloading Device  
with **Full Heel Access**

## HeelP.O.D.™ Provides an Elevated Level of Care

NelDerm's HeelP.O.D. is the only pressure offloading device that provides full access and visualization of the heel, facilitating skin assessments and wound care. While HeelP.O.D. effectively offloads or "floats" the foot, research shows it also reduces time spent on application and removal.

## HeelP.O.D. Benefits

### Comfort and Durability

#### Memory Foam Layers

Promote Comfort and Allow for Reliability throughout the Patient's Episode of Care.

### Hygienic

**Removable Cover** is Water Resistant and Easily Cleaned.

### Adjustability and Simplicity

#### Elastic Single Strap Design

Provides Adjustability, Ease of Application, and Compatibility with SCD Devices.

## Ordering Information (Positioning Wedge Included)
