

Unique Heel Access and Visualization

Reduced Workload

Confident Offloading by "Floating the Foot"

HeelP.O.D.™
PRESSURE OFFLOADING DEVICE

The **ONLY** Pressure Offloading Device with **Full Heel Access**

HeelP.O.D.™ Provides an Elevated Level of Care

NelDerm's HeelP.O.D. is the only pressure offloading device that provides full access and visualization of the heel, facilitating skin assessments and wound care. While HeelP.O.D. effectively offloads or "floats" the foot, research shows it also reduces time spent on application and removal.

HeelP.O.D. Benefits

Comfort and Durability

Memory Foam Layers

Promote Comfort and Allow for Reliability throughout the Patient's Episode of Care.

Hygienic

Removable Cover is Water Resistant and Easily Cleaned.

Adjustability and Simplicity

Elastic Single Strap Design

Provides Adjustability, Ease of Application, and Compatibility with SCD Devices.

Single Patient Use, No Latex

When measuring, include stockings and SCD sleeves as needed.
