LOVELL
 Government Services

HeelP.O.D.[™]

PRESSURE OFFLOADING DEVICE

**The ONLY Pressure Offloading Device
 with FULL HEEL ACCESS**

Nelderm's HeelP.O.D. is the only pressure offloading device that enables visual assurance of offloading while facilitating continuous use during wound debridement and dressing changes. HeelP.O.D. not only effectively positions and offloads or "floats" the foot, research shows it also reduces time spent on application and removal.

Provided by Lovell Government Services.
